Thanks Sai.

I made the change, but kept "Established by NRC", because the NRC, as I understand it, establishes the cleanup level through its licenses process. HMC proposes them, and if accepted by NRC, the NRC establishes them. Just like EPA establishing ARARs in the ROD. We do not approve ARARs proposed by PRPs in a letter. The ARARs are established in an EPA decision document.

See attached. Found a couple more agency logos – for color.

Looks great, Mark. The only one edit I would suggest is on slide 11 Ground Water Impact highlighted in red below.

- Opposes ground water cleanup levels
 - Approved by NRC and accepted by EPA and NMED in 2006

Sai, Blake,

After a last few minor revisions, here is the draft final presentation for Monday's briefing with D/DD.
